Activities

STEM Model Arab League Season '23 President

As the President of STEM Model Arab League for Season 23, I've had the privilege of leading this impactful non-profit student organization, which has been acclaimed as the team's best season to date. Under my leadership, the team underwent a remarkable transformation, including training sessions for over 150 high school students, the launch of our inaugural website, the successful organization of an in-person conference, and the groundbreaking achievement of hosting the team's first international virtual conference. We have strategically positioned the team as a recommended opportunity on various websites, expanded our influence across Egypt and Arab countries, and introduced an exclusive team package featuring shirts, bracelets, souvenirs, and flags representing Arab League countries.

Youth Pioneerin STEM Egypt Chapter Vice-President

Embarking on the inaugural chapter of the Youth Pioneer in STEM Initiative in Egypt, our primary objective was to ignite students' enthusiasm for STEM subjects. We successfully organized the first Calculus camp for our team, providing a unique learning experience. Additionally, we took the pioneering step of hosting the first-ever international Mathematics Contest, aiming to challenge and inspire young minds in the field of mathematics. This initiative not only fosters a passion for STEM but also opens new avenues for students to showcase their skills on an international platform, contributing to the growth and development of STEM education in Egypt.

X-Culture

Former

I was fortunate to secure admission as an international student by achieving a test result of +80% and ranking among the top 20% worldwide. This accomplishment granted me acceptance with full financial aid, providing an opportunity to engage in tangible, real-world business projects. The combination of academic success and financial support positions me to make meaningful contributions in the field, furthering my education and allowing me to actively participate in valuable business initiatives.

STEM Mentorship IQ Mentor

In the role of a Senior IQ Mentor, I am dedicated to guiding and preparing applicants of STEM schools, assisting them in excelling in their tests. My focus is on equipping them with the necessary skills and knowledge essential for their success. Through personalized mentoring, I aim to empower these individuals, helping them navigate the challenges of their academic journey and ensuring they are well-prepared for the opportunities and excellence that STEM education offers.

Leadership

As one of the representatives of the STEM School Student Union, I have successfully spearheaded numerous achievements. These include orchestrating two engaging fun days attended by over 400 students, with one of them recognized as the most outstanding fun day in the history of the student union. Additionally, I have coordinated three insightful field trips to various scientific research centers across Egypt, providing invaluable support to students working on their capstone projects. Furthermore, I have organized two enjoyable excursions to Port Said and Fayoum, benefiting around 150 students. Lastly, I had the privilege of representing the school at significant events, such as Water World Day, in the presence of individuals like Mr. Christian Burger, the European Union representative in Egypt, and Dr. Hany Swelim, Egypt's Irrigation Minister, alongside other notable figures in the country.
