

# *To my second home*

In the realm of circuits and dreams, my high school gleams,  
A STEM sanctuary where knowledge streams.  
Its corridors echo with the hum of innovation,  
In this home of discovery, a beacon of my education.

In the halls of algorithms and code's embrace,  
I found my passion, a lifelong chase.  
Teachers, mentors, guiding my way,  
Nurturing brilliance in the light of day.

Once a STEMmer, a title I wear,  
In the heart of equations, a student's lair.  
Every equation, a melody in my ear,  
A symphony of knowledge, crystal clear.

Among the stars of calculus and the galaxies of code,  
I tread the path that my high school showed.  
Yet, in the whispers of dreams that take flight,  
I know one day, I'll reach the college of my light.

A journey ahead, dreams to explore,  
To a college, where knowledge will pour.  
But in the tapestry of my memories' gleam,  
I'll carry the essence of my STEM dream.

Once a STEMmer, always a STEMmer,  
In the book of my life, a steadfast ember.  
. For the lessons learned in STEM's embrace,  
Shape the destiny of my learning space.
